MOHAMMAD SALMAN

SOFTWARE DEVELOPMENT INTERN

Hyderabad, India | +91 7416922398 | salmanmdsalman2829@gmail.com | GitHub | zynovextechnologies.in

PROFESSIONAL SUMMARY

Computer Science and Engineering student with hands-on experience building responsive web applications and full-stack products using React.js, Node.js, Express.js, MongoDB, JavaScript, and Tailwind CSS. Co-founder of Zynovex Technologies with experience taking products from problem definition and MVP scoping to deployment, with a strong focus on practical implementation and user-focused features.

EDUCATION

Nxtwave Institute of Advanced Technology | B.Tech in Computer Science and Engineering | Expected Graduation: 2029

CGPA: 9.91 (Sem 1), 10.00 (Sem 2)

EXPERIENCE

Co-Founder — Zynovex Technologies | 2024 – Present

Early-stage technology startup | zynovextechnologies.in

- Co-founded and helped build Zynovex Technologies from concept to a live public website, contributing to product development and technical execution.
- Worked across the front-end and backend integration layers, making technical decisions around architecture, implementation, and deployment.
- Contributed to problem identification, MVP scoping, and end-to-end product delivery, focusing on shipping working software rather than prototypes.
- Balanced startup product development with full-time B.Tech coursework while maintaining ownership of assigned technical work.

PROJECTS

QuickBill — Digital Billing Platform for Shopkeepers | React.js, Node.js, Express.js, MongoDB, Tailwind CSS

Live: quick-bill-six.vercel.app | **GitHub:** github.com/salman2829/QuickBill

- Built a full-stack digital billing and point-of-sale workflow covering inventory, billing, and payments for small shopkeepers.
- Implemented barcode-based product scanning and multiple payment modes to support faster checkout and practical retail workflows.
- Added multi-language voice support and Gemini AI-powered business insights to improve accessibility and help users understand sales data.
- Integrated WhatsApp-based bill sharing so shopkeepers can send digital receipts directly to customers.

Zynovex — Startup Product Website | React.js, Tailwind CSS, UI/UX Design

Live: zynovextechnologies.in | **GitHub:** github.com/salman2829/Zynovex1

- Designed and developed the public-facing startup website with a responsive interface focused on clean UI/UX across devices.
- Structured reusable front-end sections to communicate Zynovex Technologies' product and service offerings clearly to prospective clients.
- Implemented responsive layouts and polished visual components using React.js and Tailwind CSS.
- Contributed to the website's production launch and ongoing improvements as part of the startup's digital presence.

Nihi Studio — E-commerce Jewelry Website | E-commerce Web Development

Live: nihistudio.com | **GitHub:** Repository link not provided

- Developed an e-commerce storefront for a fine-jewelry brand, presenting 925 sterling-silver and gold-plated collections through a structured shopping experience.
- Organized product discovery with category navigation and collection sections, including gifting and personalization content.
- Built supporting customer-care and policy pages to provide a complete online shopping experience.
- Focused on a clear, responsive storefront structure to improve product browsing and customer usability.

TECHNICAL SKILLS

Languages: C++, Python, JavaScript

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend & Database: Node.js, Express.js, MongoDB

Core Concepts: Data Structures & Algorithms, OOP, DBMS
